

~~TOP SECRET~~

Approved For Release 2000/08/30 : CIA-RDP80R01443R000200070006-8
In the Soviet Note of 21 December on

the Eisenhower proposal, the following appears

"It must be remembered also that
there exist such modern types of
armaments as the rocket weapons
which modern technique enables to
be used over distances of thousands
of kilometers."

It is interesting to set this along side the 25X1X6
current interrogation of [REDACTED] the

leading German rocket scientist to come out 25X1X7

of the Soviet Union, [REDACTED]
25X1X7 [REDACTED]

25X1A9a

O/SI, is participating in his interrogation.)
25X1X6 [REDACTED]

[REDACTED] estimates that the
Russians are now in production of a 35-ton-thrust
rocket with a range of approximately ~~twice the~~ ^{600 MILES}
(EQUALS 1000 KILOMETERS).

Approved For Release 2000/08/30 : CIA-RDP80R01443R000200070006-8

~~TOP SECRET~~

This represents approximately twice the range of the German V-2 at the conclusion of hostilities. The scientist further indicated that while he had no specific proof, he believed the Russians were working on a prototype missile with an estimated range of approximately 1800 miles.
